## Gas Mileage

My car drives 570 mi with 15 gal of gas.
(1) Use mental math and/or pencil and paper to answer:
(a) If I drive 57 mi , I'll use $\qquad$ gal.
(b) If I drive $5,700 \mathrm{mi}$, I'll use $\qquad$ gal.
(c) If I have 5 gal left, I can drive $\qquad$ more mi.
(d) I can drive $\qquad$ mi with 30 gal.
(2) Calculate both unit rates for the proportional relationship. Use a calculator if you like. Write the answers here, and include the units.
(3) Answer these additional questions:
(a) If I drive 532 mi , I'll use $\qquad$ gal.
(b) If I have 11 gal left, I can drive $\qquad$ more mi.
(4) Make a two-column table using your answers to (1a), (1c), (1d), (3a), and (3b). Then use graph paper to plot the values in the table. Label the axes of your plot.
